

PERMALUBE CARRIAGE

IK Replacement Permalube Carriage

Whether you are considering rebuilding or purchasing new carriages, Clyde Industries's IK PERMALUBE carriage exchange program consists of supplying a completely new carriage at a very competitive price.

The PERMALUBE carriage uses permanently lubricated bearings to support the lance hub. These bearings are filled with a high temperature grease designed specifically for this application. This eliminates mechanical failures due to loss of lubrication, as well as oil and grease leaks which can cause a housekeeping and safety issue.

Competitor's bearing usually fail within a two year period due to the graphite wedges in the bearings breaking down.

Each PERMALUBE carriage comes with a 3 year/35,000 cycle warranty. It is permanently lubricated on the gear side and lance hub bearings. There is no need for relubrication and no oil levels to check or top off making it 100% leak proof. All of these factors make the PERMALUBE carriage maintenance free which saves you time and money.
