

EMERGENCY RETRACT TOOL KIT

In cases where the carriage cannot be automatically retracted from the furnace (like a motor overload or power failure), the carriage has to be withdrawn manually using the emergency retract shaft.

The Clyde Industries emergency retract tool kit is compatible with all RKS, RS-H sootblowers, and IK500, IK600, IK700, and IKSD series sootblowers. It is easy to install and mounts directly onto the gearbox.

The kits consists of:

- Retract tool
- Mounting hardware

Benefits

- Remote control protects operator from safety hazards inside the canopy
- Electrically operated drive unit provides quick response to a failed retract alarm
- No need for ladders or for standing on other equipment to retract gear box
- Extra long power cable allows operator to retract hard-to-reach locations at floor level
